

CRYSTAL CLEAR WATER IS OUR BUSINESS

" One stop Solution for Water
& Waste Water Treatment "

ABOUT US

Micro Fine RO Technology is a trusted supplier of Industrial Water Treatment Plants for all Pharmaceutical industries, Life Sciences, Bio-Tech, Food & Beverages, General Industrial, Petro Chemical, Power Generation, Oil & Gas Markets. Micro Fine RO Technology also offers advance systems including Pre-Treatment, RO+EDI, WFI, Ultrafiltration, DM Water, Storage & Distribution. Focussed on efficiency & sustainability we deliver cutting-edge solutions for today's Industrial and Pharmaceutical needs.

Established since 2012 the company focuses mainly on quality and ethical business practices.

OUR MISSION

As a team, we focus on delivering high quality, innovative and reliable RO Water purification systems that ensure safe and sustainable water solutions for industries, businesses, and communities.

We constantly strive to upgrade our technical knowledge to meet customer requirements with great quality.

OUR VISION

“ To become a globally trusted leader in water purification technology by continuously advancing our RO solutions, promoting sustainable water treatment solutions and empowering a cleaner, healthier future for generations to come. ”

WHY US

"MICRO FINE RO TECHNOLOGY"

OUR VALUES

**High Quality
Products**

**Skilled Team
of Professionals**

**Ethical
Business Policies**

**Easy Payment
Methods**

**Transparent
Dealings**

**Wide Distribution
Network**

**Customized
Packaging**

**Purified Water
Generation System**

**Purified Water
Generation System**

**Two Pass RO
With EDI System**

**Multi Column
Distillation Plant**

**Pure Steam
Generator System**

**Purified Water Storage
& Distribution System**

**Loop System Piping
(Pendants)**

**Water For Injection
WFI Tank**

**Purified Water
Tank**

**7"x32" Multi
Bag Filter Housing**

**7"x16"
Bag Filter Housing**

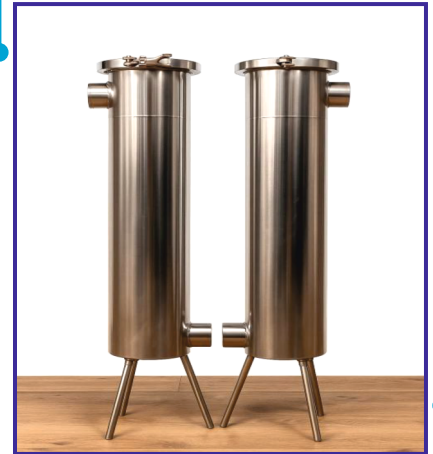

**7"x32"
Bag Filter Housing**

**5" Micron
Cartridge Filter**

**4"x20" Multi
Cartridge Filter**

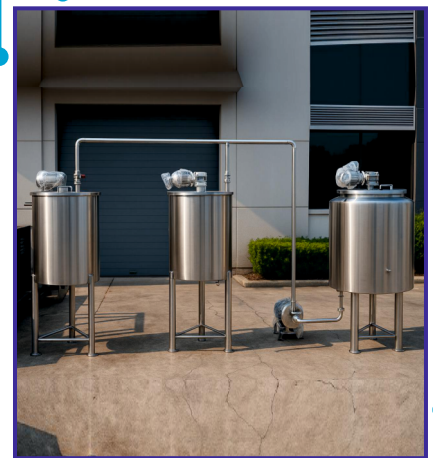

**4"x20" Single
Bag Filter Housing**

**Duplex
Basket Filter**

**Sugar
Syrup Tank**

**Sterilized Sugar
Syrup Tank**

6000 LPH SS RO Plant

EFFLUENT TREATMENT PLANT / SEWAGE TREATMENT PLANT

Micro Fine has worked with Effluent Treatment Plants mostly all kind of industries, which generate mild to highly polluted waste water requiring simple to extensive treatment to meet the required level of treatment. We have achieved 100% success rate in treating industrial effluent and helped industries to achieve zero discharge. Our technologies for ETP includes from conventional chemical, activated sludge to most advance MBR, electro-call process.

A large quantity of industrial and commercial effluents cause pollution in our environment. Our plants handle these effluents in most to make our environment safe and healthy. To keep our environment safe, we offer innovative Effluent Treatment Plants to remove the pollution effluents with economical operation and quality discharge to meet the stringent pollution control norms.

It mainly depends upon the type of effluent when various processes are developed for the cost effective treatment. The technological solutions are available after complete research and trial run at our pilot plants.

Our Effluent Treatment Plants cater in diversified areas such as Textile Industry Electroplating and Picking Industries, Hospitals, Automobile Industries, Export Houses etc to name a few.

INDUSTRIES WE SERVE

**Pharma
Industry**

**Water and
Waste Water**

**Desalination
Industry**

**Process and
Utility**

**Chemical
Industry**

**Oil and
Gas**

**Food and
Beverage**

**Power
Industry**

**Electronics
Industry**

ULTRA FILTRATION SYSTEM

*" One stop Solution for
Water & Waste Water
Treatment "*

SERVICE OFFERED :

- Water Treatment Plant based on Reverse Osmosis (RO) Electro De Ionization (EDI) Systems, Multi Column Distillation Plant (MCDP), Purified Water distribution system, Purified Water Storage Tank, RO Plant, RO Water Storage Tanks, WFI Water Storage Tanks, Ultra Water Filtration System & Many More.
- Consultation & Feasibility Studies. ▪ Design & Engineering. ▪ Manufacturing & Supply. ▪ Project Execution & Installation. ▪ Commissioning & Validation.
- Water softening plant for hard water for applications like Boiler Industry, Soft Drink Plant & etc.
- Annual maintenance contract for systems supplied by us.
- Supply of spares (Cartridge Filters, RO Membranes etc.)
